SUNSCREEN AND ROLLER BLIND SYSTEMS FOR SHIPS & TUGS

SUNSCREENTM**9N**

The UV protection films are imported from Europe. By the state of the art stretching mechanism, the shades would stay perfectly parallel to the bridge windows which are not vertical most of the time. The shade can be rolled up at dark, in the cassette made of aluminium in order to improve visibility. General benefits can be listed as;

- Reduce 90% of GLARE which gives 100 % clear view for safer navigation,
- Reduce 64% of HEAT and 99% + UV RADIATION,
- Reduce risk of accidents by improved concentration,
- Reduce eye fatigue and related problems with vision, resulting in missed information,
- Improve the navigation safety by eliminating the direct and indirect sun glare,
- Helps cooling of the navigation bridge, which makes the working environment

comfortable,

- Reduce instrumentation overheating caused by radiation,
- Mitigate the hardening and ageing effect of the sun beam on bridge equipment and furnitures,
- Perfect solution for monitor reflection of navigation equipment,
- Self retractable when relieved,
- Wood design and silver gray colour options for protective aluminum cartridge,
- Custom made production according to your navigation bridge geometry,
- Can be kept any middle position easily by the special string attachments,
- Unwanted heat accumulation is prevented by carefully adjusted clearance between glass and the film,
- Complies with SOLAS II Chapter V Reg 22,

That is why we urge to use the sunscreens on all windows of the bridge.

The stretching mechanism has been developed and produced to meet the customers' demand of being furnished with improved stretching and long-lasting features. By our specially produced **REINFORCED/STRENGTHENED SPRING MECHANISM;**

Unwanted noise caused by vibration is prevented

The film and the skirt stay perfectly tight in any position

Annoying friction noise between the skirt and the frame is prevented forever

by **BALMARIN**

Roller Blinds

- Special blackout fabric roller blind which blocks out all light , providing complete privacy and creating ideal environment for sleeping and relaxing,
- Suitable for all non-navigational windows on all vessel types,
- Protective aluminium cassette with side rails,
- Wide variety of fabric colours,
- Can be personalised with your logo etc.,
- Relatively short delivery time,
- Flexible service for perfect installation,
